Aurora Café Website

Project Explanation and Page-by-Page Overview

This report explains the Aurora Café website based on the five supplied screenshots. It describes the purpose of each page, visible features, design approach, possible technologies, and testing considerations.

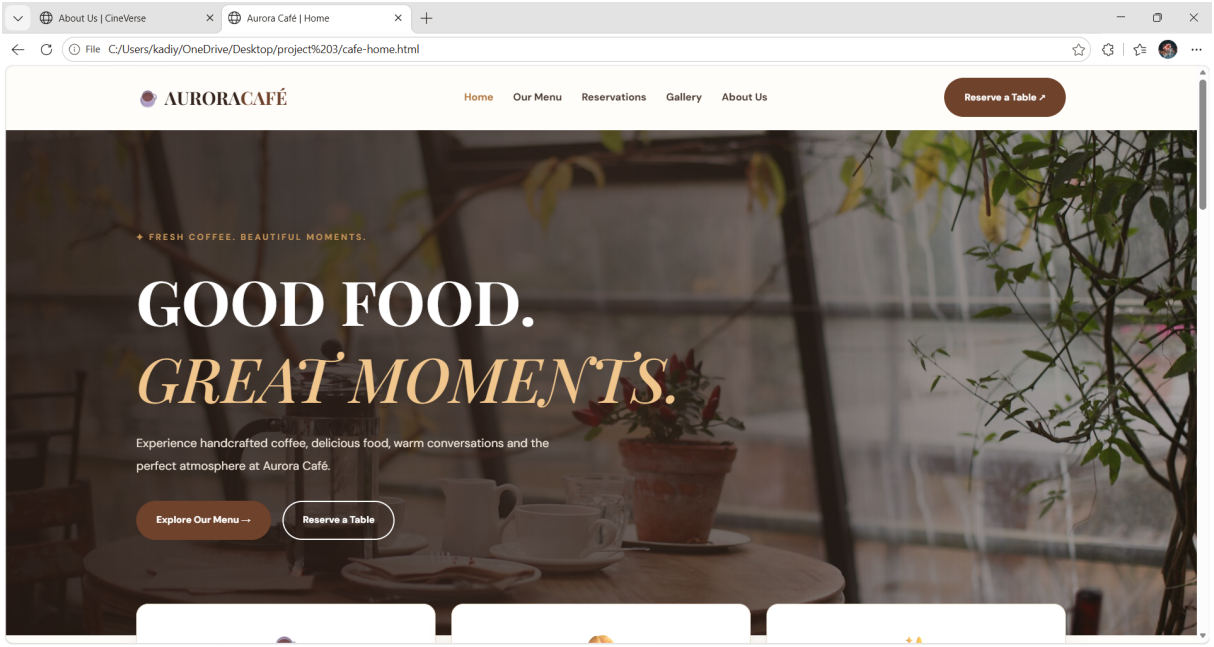

Figure 1. Aurora Café home page

1. Project Overview

Aurora Café is a café website concept that introduces the café's atmosphere, displays its menu, offers a reservation inquiry form, presents a photo gallery, and shares the café's story. The design uses warm brown and cream colors, gold accents, large café photographs, elegant serif headings, and clear navigation.

Project objectives

• Create a welcoming online introduction to Aurora Café.

• Help visitors explore coffee, food, and dessert options.

• Provide a page where visitors can submit a sample table reservation inquiry.

• Show café atmosphere, drinks, food, and interior imagery in a gallery.

• Communicate the café's story and brand identity.

2. Home Page

The Home page introduces the café with the headline "Good Food. Great Moments." A large background photograph shows a warm café setting, while supporting text mentions handcrafted coffee, delicious food, conversations, and atmosphere. The "Explore Our Menu" and "Reserve a Table" buttons provide direct paths to important sections. A row of feature cards begins below the hero area.

Purpose: make a positive first impression and help visitors quickly find the menu or reservation page.

3. Our Menu Page

The Menu page uses a food photograph and the heading “Explore Our Menu.” The subtitle introduces a selection ranging from freshly brewed coffee to desserts. Below the banner, “Made Fresh, Served With Love” introduces the menu collection.

Purpose: organize café offerings so visitors can review available drinks and food. Menu entries may include item names, descriptions, prices, and categories if those details are present in the full page.

4. Reservations Page

The Reservations page invites visitors to plan their visit. Its banner reads “Plan Your Visit,” with a subtitle about coffee, conversations, and special moments. Below it, the page contains a “Table Inquiry” section and a form beginning with a Full Name field.

A typical reservation form can ask for a visitor’s name, contact information, date, time, party size, and special requests. These are common examples; only fields actually present on the page should be described as implemented.

Important: the screenshot shows a sample reservation form, but does not prove that submissions are stored, emailed, or connected to a live booking system.

5. Gallery Page

The Gallery page is introduced by the heading “Our Café Gallery” and a short description inviting visitors to explore the visual inspiration behind the café atmosphere. The next section, “A Glimpse of Aurora Café,” presents the gallery as a collection of café photography.

Purpose: visually communicate the café’s environment, coffee preparation, food presentation, and overall experience.

6. About Us Page

The About Us page introduces the story behind Aurora Café. Its banner says “Welcome to Aurora Café,” followed by a message about coffee, comfort, and community. The “Our Story” section includes the heading “Crafted With Love and Passion” and a photograph related to coffee preparation.

Purpose: explain the café’s identity, values, and the experience it aims to provide. Additional content could describe the café’s mission, approach to ingredients, or community focus if included in the full page.

7. Common Design and Navigation

• Consistent navigation: Home, Our Menu, Reservations, Gallery, and About Us appear across the pages.

• Brand palette: cream and white backgrounds combine with deep brown and warm gold accents.

• Hero sections: large background images and dark overlays keep the headings readable.

• Typography: serif headings create an elegant, welcoming café identity; simpler body text supports readability.

• Call-to-action buttons: brown buttons emphasize menu exploration and reservation actions.

• Active navigation state: the current page is highlighted with a warm accent color.

8. Technical Description

The screenshots show a multi-page website with separate pages for Home, Menu, Reservations, Gallery, and About Us. If implemented with standard web technologies, HTML can provide the page structure, CSS can control layout, typography, colors, and responsive behavior, and JavaScript can support interactive features such as form validation or gallery interactions. The screenshots alone do not establish whether a backend, database, or live reservation service is connected.

9. Testing Checklist

• Check that all five navigation links open the correct pages.

• Test the “Explore Our Menu” and “Reserve a Table” buttons.

• Verify that menu content and gallery images display correctly.

• Test required fields and validation in the reservation inquiry form.

• If reservation submission is intended to be functional, verify its success and error messages and where the data is delivered.

• Check page layout and readability on desktop, tablet, and mobile sizes.

• Ensure text remains readable over background photographs and buttons are easy to identify.

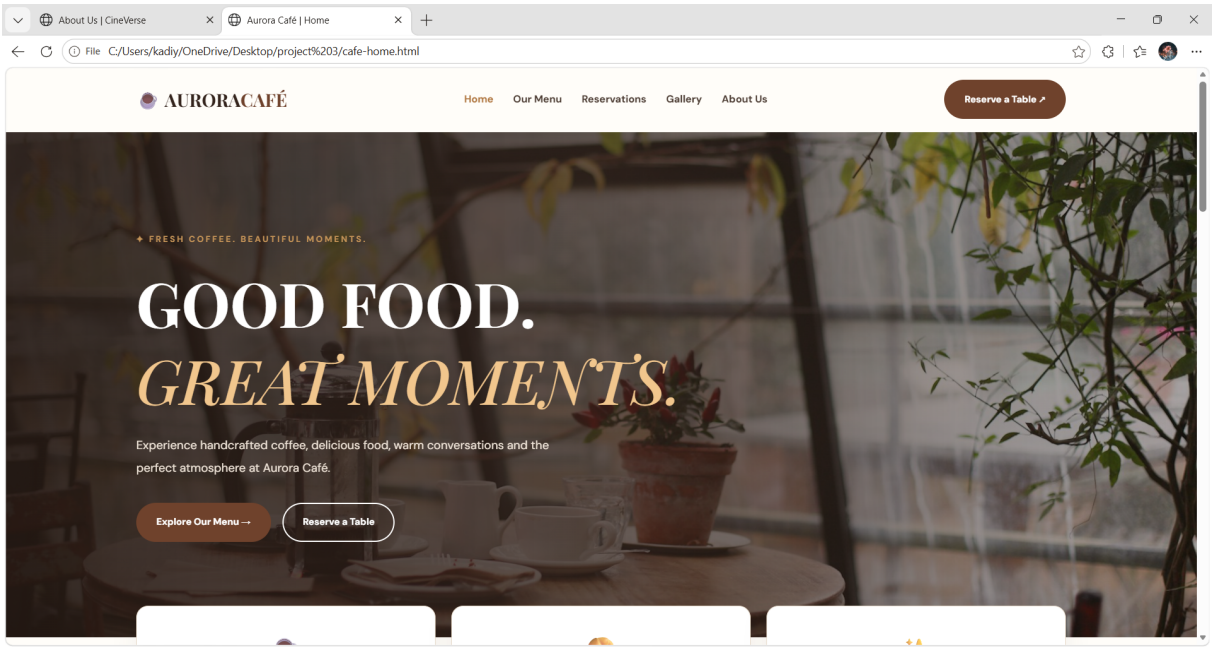

10. Conclusion

Aurora Café is designed as a warm, elegant café website. The Home page welcomes visitors, Our Menu introduces the café’s offerings, Reservations provides an inquiry form, Gallery showcases visual content, and About Us explains the café’s story. Consistent navigation and a cream, brown, and gold color scheme connect all five pages

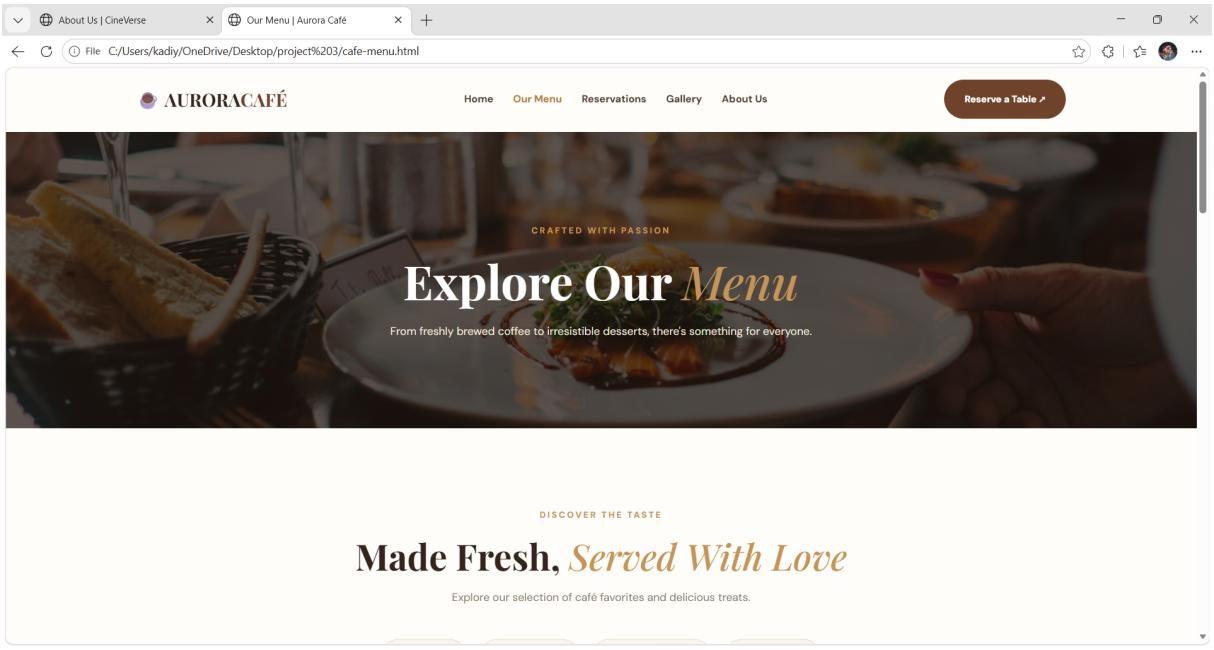

into a unified website experience.
